

Gentrification in Deptford

Gentrification in Deptford

Having lived near Deptford for many years now, I have witnessed massive changes in the area. Some of this has been quite gradual while recently there has been a more drastic change in appearance. The changes have, continue to and will affect Deptford and its people in profound ways and I believe it is important to document some of this changing Deptford from the perspective of a local inhabitant. In this project I aim to show the development from my point of view and how I perceive a gentrification process occurring.
